- Electronically sign completed documents using integrated eSign technology
- Globally available on all carrier networks

Dictate

To stay ahead of the competition, everything is time critical. But inefficient work processes slow down productivity and hamper the speed at which information can be shared. Document meetings; summarize depositions or hearings; create letters and more. These tasks and others are all critical but time consuming. And many attorneys are typing their own work today that ever before due to staffing constraints.

Until now, there hasn't been a solution that can handle the needs of the busy legal professional in the office and on the go. Associate Dictate is a complete enterprise voice capture and workflow solution that enables attorneys and law firms to increase efficiency and productivity.

Associate Dictate restores time lost in the document creation process. The typical attorney types 35 to 55 words per minute. By utilizing Associate Dictate, a smartphone tablet or desktop microphone and the integrated speech recognition from Nuance, legal professionals can speak 120 words per minute or more and have a draft of the audio available for use within minutes.

- A complete voice dictation system that captures, manages, transfers, translates and integrates verbal recordings into a centralized system for work processing and automation
- Dictate Notes right after a meeting and have them available for review in just minutes or dictate directly into your computer
- Dictate on the go, send wirelessly and have staff begin working on documents on your behalf before you return to the office
- Create drafts of documents using Dragon and leverage staff for clean-up and proofing
- Transfers information securely at anytime
- Integrated with Dragon NaturallySpeaking to convert voice to text accurately to expedite use of information

ASSOCIATE DICTATE

The entire Associate Dictate solution meets all regulatory requirements for security, privacy and reliability. Provided as a Software as a Service (SaaS) solution, Associate Dictate is a secure (SAS70 Level II) yet easy to configure with minimal administrative effort. Rules and policies can be defined for the organization, departments, locations or even down to the individual. Associate Dictate is globally accessible, enabling organizations to extend dictation and workflow capabilities and work processing functions to any employee anywhere in the world.

Associate Dictate is an ideal solution for individuals that are in need being productive on the go and in the office. Not only does it capture and archive voice information, it also expedites your personal work by turning your spoken words to text for you or your staff to use instantly.

ABOUTPORTNEXUS

PortNexus, founded in 2003, is proud to be the only USA Certified application development and marketing company that provides an innovative line of business solutions to the Legal, Medical, Financial and Field Service industries.
